

Santosh Kirtane

MERN Stack Developer | Full Stack Developer

+91 9309973107 | santosh080904@gmail.com | Pune, Maharashtra

GitHub: [SantoshK0809](https://github.com/SantoshK0809) | Portfolio: <https://santoshkirtane.netlify.app/> | LinkedIn : [Santosh-Kirtane](https://www.linkedin.com/in/santosh-kirtane)

TECHNICAL SKILLS:

Languages: JavaScript, Java

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Socket.io, WebRTC

Database: MongoDB, Mongoose

Authentication & Security: JWT, RBAC, Session Authentication

Cloud & Media: Cloudinary, Multer, MongoDB Atlas

Developer Tools: Git, GitHub, Postman,

Core Concepts: MVC Architecture, Real-Time Communication, API Development, Data Structures & Algorithms

PROJECTS:

1. AlumniConnect — Multi-Role Alumni Networking Platform

[GitHub - repo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, MongoDB, Cloudinary

- Developed a multi-role networking platform to enhance workflows for Students, Alumni, Teachers, Admin, and Super Admin using **RBAC architecture**.
- Designed** secure **JWT authentication** and authorization middleware; created **REST APIs** for user management, posts, events, profiles, and alumni-student interactions.
- Implemented** Socket.io-based real-time messaging, **persistent notifications**, and **AES-256 encrypted chat workflows** for secure communication.
- Developed** alumni search and filtering based on company metadata and technical skills, **Improved search efficiency** through indexed MongoDB queries for skills and company filters.
- Structured** the backend using **MVC architecture** with reusable middleware and modular components; Reduced API response payload by ~70% using pagination for chat history retrieval.

2. LinkUp — Real-Time Video Communication Platform [Live](#)

[GitHub - repo](#)

Tech Stack: MERN Stack, Socket.io, WebRTC, JWT

- Engineered a real-time video communication platform** using **WebRTC** peer-to-peer architecture for low-latency media streaming.
- Implemented Socket.io-based signaling server** for SDP exchange, ICE candidate transfer, and real-time room communication.
- Integrated STUN/TURN servers** to support NAT traversal and stable peer connectivity across multiple network environments.
- Developed JWT-based authentication** and protected meeting routes for secure user access.
- Managed media stream lifecycle handling** including camera/audio toggling, peer cleanup, and dynamic room synchronization.

3. AnalyticsAI — AI-Powered Interview & Resume Analysis Platform [Live](#)

[GitHub - repo](#)

Tech Stack: MERN Stack, Gemini API, JWT, MongoDB

- Developed an AI-powered career analysis platform** that evaluates resumes, job descriptions, and self-assessments to generate personalized interview preparation insights.
- Integrated the Gemini API** to produce ATS-style matching analysis, interview questions, behavioral assessment prompts, skill gap identification, and preparation roadmaps.
- Designed backend APIs** for prompt handling, response processing, authentication, and structured AI output generation.
- Implemented JWT-based authentication** to secure user workflows and protect access to personalized analysis sessions.
- Structured the frontend using reusable React components** for dynamic rendering of AI-generated feedback and preparation insights.
- Managed asynchronous API workflows** and error handling to ensure reliable AI response generation and user interaction.

EDUCATION SECTION:

- Bachelor of Engineering (Information Technology)**
Savitribai Phule Pune University
- HSC (XII) – Maharashtra State Board**

CGPA: 8.98 | Expected Graduation: 2026

Percentage: 84%
